

PREMIUM NON-LATEX
DENTAL DAM

AWARD WINNING NON-LATEX DENTAL DAM

Isodam® The primary function of Isodam® is to isolate specific areas of the mouth during procedures, reduce the risk of infection, and provide comfort to the patient. The Isodam® provides exceptional stretch, strength, and tear-resistance while eliminating the potential for allergic reactions associated with latex products.

Why Isodam®?

- **Superior Elasticity**

The polyisoprene material used to create the Isodam® allows for an incredible up to 1200% elongation that virtually eliminates tearing even with a punched dam.

- **Size and Gauge Options**

The Isodam® is available in medium, heavy and now X-heavy gauges and 5" x 5" or 6" x 6" squares, ensuring the best non-latex dental dam option is available for any procedure.

- **Economy Package**

For those that use Isodam® on a regular basis, our economy package holds 5 times more dams than our standard package, creating less waste and greater savings.

Product Specification

Synthetic Polyisoprene, not made with natural rubber latex

100% non toxic pigment

Non-sterile / Single use

ALSO AVAILABLE IN HD

The Royal Blue colour of the Isodam® HD Dental Dam provides increased contrast to the tooth for better dental photography
